Why Choose PROCAS?

PROCAS is built to simplify DCAA Compliance and help you grow your business by providing an all-in-one Accounting, Timekeeping, Expense Reporting, and Project Management Reporting solution. We understand your time is valuable, so the setup process is uniquely streamlined for a smoother transition. You only pay for what you need, making our flexible pricing an affordable option no matter the size of your company.

10 Reasons Why PROCAS is Different

1 Compliance by design – beginning with timesheet processing, labor distribution, indirect cost pools, and project cost and revenue management

2 Modern architecture designed for rapid implementation and end user adoption to increase ROI

3 Reduce month-end close process from days to hours through automated processes. 2 week build cycle means continually improve our clients' efficiency

4 Track profit margins by contract, task order, employee, and subcontractor, including burn rates by person

5 Custom "standard" reports – modify system reports and save as a menu option or use Power BI

6 Out of the box dashboards

7 Modern Web API delivers powerful integrations

8 Support staff are all US based accountants, experienced in government contract accounting

9 Implementation methodology includes loading project history, producing government invoices, and closing the month, all with industry leading speed

10 For over 25 years, our sole focus has been to simplify government contracting

Here's How PROCAS Can Help You Grow Your Business

Tools for Government Contractors

- Integrated accounting, billing, timesheet, and expense report system
- Intelligent Financial Architecture segregates direct, indirect, and unallowable costs, and supports flexible indirect cost pools.
- Automated billing supports cost-plus fixed fee (CPFF), time & material (T&M), and firm fixed price (FFP) contract types, and includes billing ceilings
- Standard Form 1034/1035 invoice formats included and customizable.
- The distribution of direct and indirect labor hours and costs are recorded automatically from employee's timesheets
- Mobile-friendly timesheets improve accessibility for employees
- Detailed audit trail tracks every update by users
- Easy and flexible indirect rate structure setup
- Built-in financial dashboards provide instant access to current cash, A/P, and A/R balances as well as financial statements and financial ratios

DCAA and GAAP Compliance by Design

- Accrual-based project cost accounting
- Flexible coding structure tracks costs by project, WBS, labor category, employee and/or contract line-item number (CLIN)
- Automated indirect rate calculations and applications can be run at any time
- Timesheet and expense authorizations are assigned to employees
- Detailed audit trail of all timesheet entry, changes, and approvals
- Electronic signature and approval of timesheets and expense reports, with automated notifications
- Automated update of government per diem rates

Reporting for Projects & Incurred Cost Submissions

- Built-in project dashboards provide visibility into funding, funds remaining, and profit by project
- Job Cost Ledger
- Contract funding and backlog reporting
- Project-based profitability reporting using actual, provisional, or budgeted indirect rates
- Standard reports include Incurred Cost Submission: Schedule H, Schedule I, Schedule K, and Schedule L
- WebAPI and Power BI deliver custom reports, dashboards, and data refresh connectivity with other business systems
